

Elfin body pattern

I have done the pattern pieces in pdf so that you don't have to resize them...then this week you will have the pattern instructions...this is body pattern just a basic pattern...for a short chubby elfin...

Supplies needed for this week:

- 1/4 yard of body fabric
 - Freezer paper
 - Stuffing
 - Paint for shoes

Read thru entire pattern before beginning

Trace all body parts on to freezer paper...these are templates or sewing lines...cut out pattern pieces and iron on double fabric (with right sides together)...

Body

Sew around entire body leaving open at the neck to turn and stuff threw...cut out leaving seam allowance...remove freezer paper...clip curves...turn and stuff...

Arms

Stitch around the arms...make sure to stitch about 2 stitches sideways between fingers and thumb...cut out leave seam allowance and remove freezer paper...clip curves and turn... then you can stitch arms to the body.

Legs

Stitch around legs leave open at top of legs... cut out leaving seam allowance...remove freezer paper...clip curves and turn and stuff... then stitch to body...

I paint the shoes with acrylic paints and it's easier to paint shoes before sewing them to the body...
